The Project

Alder King Planning Consultants were appointed by British Waterways to cover the maternity leave of their planner in British Waterways South West region and also to work on specific national planning projects.

The key tasks carried out to date involve responding to Local Planning Authorities' planning policy consultations; making representations on LDF documents and promoting various sites through Strategic Housing Land and Availability Assessments.

National work undertaken includes:

- Developing enhancements to the GIS database;
- Writing a guidance document for the planning database;
- Training staff on the planning database;
- Assisting in the reporting of British Waterways planners' performances and production of statistics for DEFRA; and
- Suggesting service improvements and writing procedure notes.
