## The Project

The ROF Puriton site is a decommissioned munitions factory owned by BAE Systems. The entire site is approximately 270ha in size and features substantial brownfield zones as well as areas of high ecological importance.

Alder King Planning Consultants have made representations for the redevelopment of the site for employment use as part of the SW RSS and Sedgemoor Council LDF processes, including appearing at the RSS examination in public. AKPC has led the co-ordination of a range of background studies and the preparation of a draft masterplan. The site lies outside the Bridgwater urban area but AKPC have successfully negotiated an allocation for an 'Energy Park' in the emerging Sedgemoor District Council Core Strategy.

Liaison is on-going with the Council and AKPC, in conjunction with the masterplanning team, are working toward an Outline Application submission accompanied by a detailed masterplan in 2011.
