The Project

Refurbishment of Rashleigh House

The project involved the design and refurbishment of an existing part four storey 'curtilage listed' boarding house providing new dormitories, en-suite bedrooms and staff flats for 36 students and staff at Truro High School for Girls.

The project was procured under a negotiated single stage design & build process using an amended DBO5 of contract. The design team were appointed and retained by the contractor during the pre and post contract stages.

The contract sum was £ 800,000. Work commenced onsite in September 2008 and practical completion was granted in April 2008.

Works has recently commenced onsite to construct a newbuild single storey modern languages laboratory which has been procured under the same method. The contract sum is £ 550,000.
